WARNING! Before you begin to install the appliance, read the content in the Enterprise Products Safety, Environmental, and Regulatory Information booklet supplied in the shipping carton.

Latest Software: We recommend that you install the most recent software release to stay up-to-date with the latest functional improvements, stability fixes, security enhancements, and protection against new and evolving attacks.

Thank you for choosing the Check Point Smart-1 525 Security Management Appliance, part of the Check Point Infinity consolidated architecture. You are now minutes away from setting up the most advanced security platform designed to prevent the most sophisticated threats today and in the future.

Should you have any questions about your purchase, please don’t hesitate to contact Check Point support services.

1. **POWER UP YOUR CHECK POINT APPLIANCE AND INSTALL THE BEZEL**

   - Connect the power cables (one is used for redundancy) to the power ports on the Smart-1 appliance rear panel and plug them into a power outlet.
   - Turn the power on.
   - Locate and remove the bezel key from the back of the bezel.
   - Hook the right end of the bezel onto the appliance.
   - Fit the left end of the bezel onto the appliance.
   - Push the release latch next to the keylock.
   - Lock the keylock at the left end of the bezel.
2 CONNECT YOUR PC FOR INITIAL SETUP

- Initial setup must be done from a PC connected to the appliance’s management interface via the included Ethernet cable. Management interface is marked as MGMT on the appliance rear panel.

Windows 7, 8, and 10 configuration:

- Right-click on the network adapter you want to assign an IP address and click Properties. Select Internet Protocol Version 4 (TCP/IPv4) and click the Properties button.
- In the IP address field, enter 192.168.1.2.
- In the Subnet mask field, enter 255.255.255.0.
- Leave the Default gateway and DNS settings fields empty.
- Click OK and close the dialog boxes.
- After completing the initial connection, the First Time Configuration Wizard will guide you through the process of configuring the appliance.
CONFIGURE YOUR APPLIANCE

• Launch the Web browser and enter https://192.168.1.1 in the address bar.  
  
  Note – You might receive a certificate error page due to a known, unresolved  
  browser conflict. Click Continue to this Web site.

• Log in with the default system administrator login name/password,  
  admin/admin, and click Login.
