UTM-1™ Quick Start Guide

Includes Check Point Software Blades
Power Up Your Check Point UTM-1 Appliance

- Connect the power supply unit to the power port on the UTM-1 appliance rear panel. Plug the power supply unit into a power outlet.
- The power LED turns on.

Connect Your PC for Initial Setup

- Initial setup must be done from a PC connected to the appliance’s internal interface (marked INT) via the included Ethernet cable. After completing the initial connection, the First Time Configuration Wizard will guide you through the process of configuring the appliance.
- Before continuing, make sure your PC is configured correctly.
Power Up Your Check Point UTM-1 Appliance

- Connect the power cable to the power port on the UTM-1 appliance rear panel and plug it into a power outlet.
- Turn the power on.

Connect Your PC for Initial Setup

- Initial setup must be done from a PC connected to the appliance’s internal interface via the included Ethernet cable. After completing the initial connection, the First Time Configuration Wizard will guide you through the process of configuring the appliance.
- Before continuing, make sure your PC is configured correctly.
For Windows XP Operating Systems

- Click > Settings > Control Panel > Network Connections.
- Double-click Local Area Connection.
- In the General tab, click Properties.
- In the IP address field, enter 192.168.1.2.
- In the Subnet mask field, enter 255.255.255.0.
- Leave the Default gateway and DNS settings fields empty.
- Click OK and close the dialog boxes.

For Windows Vista Operating System

- Click > Control Panel > Network and Internet > Network and Sharing Center > Manage network connections.
- Right-click Local Area Connection, and then click Properties. If you are prompted for an administrator password or confirmation, type the password or provide confirmation.
- Click the Networking tab. Under This connection uses the following items, click Internet Protocol Version 4 (TCP/IPv4), and then click Properties.
- In the IP address field, enter 192.168.1.2.
- In the Subnet mask field, enter 255.255.255.0.
- Leave the Default gateway and DNS settings fields empty.
- Click OK and close the dialog boxes.
Configure Your UTM-1 Appliance

- Launch the Web browser and type `https://192.168.1.1:4434` in the address bar.

  **Note** – When using the Internet Explorer 7.0 browser, you might receive a certificate error page due to a known, unresolved browser conflict. Click **Continue to this Web site**.

- Log in with the default system administrator login name/password, `admin/admin`, and click **Login**.

  **Note** – Popups must always be allowed on `https://<appliance_ip_address>`.

- After logging in for the first time and changing the default login name and password, the First Time Configuration Wizard will begin automatically.
- The wizard will guide you through the connection setup process. Fill in the parameters as required and click **Finish**.

For additional information regarding setting up your appliance, refer to the UTM-1 Getting Started Guide.
Registration and Technical Support

**Appliance Registration**

UTM-1 appliances require a license to be installed prior to operation.

To license and register your appliance, please visit:
http://register.checkpoint.com/cpapp

If you are evaluating a UTM-1 appliance, you will have access to a 15-day evaluation license key.

**Note** – The MAC address is required to obtain a license, and it can be found on the Information > Appliance Status page of the Web management interface.

**Appliance User Center**

For further information about the UTM-1 appliance, see:
