POWER UP YOUR CHECK POINT APPLIANCE

- Connect the power cable to the power port on the Smart-1 appliance rear panel and plug it into a power outlet.
- Turn the power on.
**CONNECT YOUR PC FOR INITIAL SETUP**

- Initial setup must be done from a PC connected to the appliance’s management interface via the included Ethernet cable. Management interface is marked as MGMT on the appliance front panel.

- **Windows 7, 8, and 10 configuration:**
  - Right-click on the network adapter you want to assign an IP address and click **Properties**. Select Internet Protocol Version 4 (TCP/IPv4) and click the **Properties** button.
  - In the IP address field, enter **192.168.1.2**.
  - In the Subnet mask field, enter **255.255.255.0**.
  - Leave the Default gateway and DNS settings fields empty.
  - Click **OK** and close the dialog boxes.
  - After completing the initial connection, the First Time Configuration Wizard will guide you through the process of configuring the appliance.
CONFIGURE YOUR APPLIANCE

- Launch the Web browser and enter **https://192.168.1.1** in the address bar.
  
  **Note** – You might receive a certificate error page due to a known, unresolved browser conflict. Click **Continue to this Web site**.

- Log in with the default system administrator login name/password, **admin/admin**, and click **Login**.

  **Appliances Login Page**

  **Note** – Popups must always be allowed on **https://<appliance_ip_address>**.

- The First Time Configuration Wizard will begin automatically (Fig. 3).

- The wizard will guide you through the connection setup process. Fill in the parameters as required.
