4000 Appliances Image Management

Congratulations on your purchase of a Check Point appliance. This appliance is preinstalled with images for these software versions:

- R75.40 Gaia
- R75.30 SecurePlatform
- R71.40 SecurePlatform

Default Image

When the appliance is turned on for the first time, it loads with the default image: Check Point R75.40 on the Gaia operating system.

Selecting a Software Image

Use the LCD panel to change the software image or to revert back to the factory default settings for the current software image.

**To change the software image for the appliance:**
1. Reboot or power on the appliance.

2. When the countdown begins, press the up arrow on the LCD panel. The Boot menu appears.
   - Using the arrow buttons, select a software image from the list and press the right arrow.

3. Press the up arrow to confirm the reset.
4. Wait for the appliance to revert to the software image. This process takes up to 20 minutes, depending on the appliance model.
After the process has finished, the appliance boots with the selected software image.
