**WARNING!** Before you begin with the appliance installation, read all the safety instructions. Search for *16000 Appliances Getting Started Guide* or use this link: [http://downloads.checkpoint.com/dc/download.htm?ID=86065](http://downloads.checkpoint.com/dc/download.htm?ID=86065)

**Latest Software:** We recommend that you install the most recent software release to stay up-to-date with the latest functional improvements, stability fixes, security enhancements, and protection against new and evolving attacks.

Thank you for choosing the Check Point 16000 Series Security Appliance, part of the Check Point Infinity consolidated architecture. You are now minutes away from setting up the most advanced security platform designed to prevent the most sophisticated threats today and in the future.

Should you have any questions about your purchase, please don’t hesitate to contact Check Point support services.

**POWER UP YOUR CHECK POINT APPLIANCE**

- Connect the power cables to the power ports on the appliance rear panel and plug them into power outlets. The machine is powered on automatically after connecting the power cords.
CONNECT YOUR PC FOR INITIAL SETUP

- Initial setup must be done from a PC connected to the appliance’s management interface via the included Ethernet cable. Management interface is marked as MGMT on the appliance front panel.

Windows 7, 8 & 10 configuration:

1. Right-click a **network** adapter to assign an IP address and click **Properties**.
2. Select Internet Protocol Version 4 (TCP/IPv4) and click the **Properties** button.
3. In the IP address field, enter **192.168.1.2**.
4. In the Subnet mask field, enter **255.255.255.0**.
5. Leave the **Default gateway** and **DNS settings** fields empty.
6. Click **OK** and close the dialog boxes. After completing the initial connection, the First Time Configuration Wizard guides you through the process of configuring the appliance.
CONFIGURE YOUR APPLIANCE

1. Launch the Web browser and enter https://192.168.1.1 in the address bar.
   Note – You might receive a certificate error page due to a known, unresolved browser conflict. Click **Continue to this Web site**.

2. Log in with the default system administrator login name/password, **admin/admin**, and click **Login**.
