Congratulations on your purchase of a Check Point appliance. This appliance is preinstalled with images for these software versions:

- R76 Gaia
- R75.45 Gaia
- R75.30 SecurePlatform

**Default Image**

When the appliance is turned on for the first time, it loads with the default image: Check Point R76 on the Gaia operating system.

**Changing the Software Image**

Use the LCD panel to change the software image or to revert back to the factory default settings for the current software image. The 21000 Appliances Getting Started Guide (http://supportcenter.checkpoint.com/file_download?id=12317) also describes how to use these procedures to change a software image:

- First Time Configuration Wizard
- WebUI
- Console boot menu

**To change the software image for the appliance:**
1. Reboot or turn on the appliance.
2. When the countdown begins, press an arrow button.
The Boot menu shows.

3. Use the arrow buttons to scroll and select a software image from the list.

4. Press △.

5. Confirm the reset and press △ again.
   If you press a different button, the Action Cancelled message shows.

   Action Cancelled
   Press any key

At this point, if you press a key, the boot menu shows.

6. After you confirm the reset, wait for the appliance to enable the selected image.
   During the restore, a message shows continuously: Reverting image. Do not turn off.
   After the process has finished, the appliance boots with the selected software image.
