Replacing Check Point 21000 Appliance Line Cards

There are three Line Card slots in the front of the appliance.

⚠️ **Important** - Make sure that you are electromagnetically grounded when performing these procedures. Static electricity can damage the appliance.

**To remove a Line Card:**
1. Turn off the appliance.
2. Loosen the thumb screws on the two sides the Line Card.
3. Squeeze the spring-loaded section of ejector handle in the direction of the outer edge of the Line Card, and turn the ejector out. Do this simultaneously on the right and the left ejectors.

**To install a Line Card:**
1. Turn off the appliance.
2. Insert the Line Card with the ejectors rotated out a small distance.
   Make sure that the alignment pins behind the thumb screws engage the top hole.
3. Push the card in until the Line Card is fully inserted.
When the card is fully inserted, the ejector rotates in.

4. Tighten the thumb screws on the two sides of the Line Card.
