Check Point 21000 Appliances
Quick Start Guide

Includes Check Point Software Blades
Power Up Your Check Point 21000 Appliance

- Connect the power cable to the power port on the 21000 appliance rear panel and plug it into a power outlet.
- Turn the power on.
- The LCD will display your appliance’s model number.

Connect Your PC for Initial Setup

- Initial setup must be done from a PC connected to the appliance’s management interface via the included Ethernet cable. Management interface is marked as MGMT on the appliance chassis. After completing the initial connection, the First Time Configuration Wizard will guide you through the process of configuring the appliance.
- Before continuing, make sure your PC is configured correctly.
For Windows XP

- Click **Start**, > **Settings** > **Control Panel** > **Network Connections**.
- Double-click **Local Area Connection**.
- In the General tab, click **Properties**. Under This connection uses the following items, click **Internet Protocol Version 4 (TCP/IPv4)**, and then click **Properties**.
- In the IP address field, enter **192.168.1.2**.
- In the Subnet mask field, enter **255.255.255.0**.
- Leave the Default gateway and

For Windows 7

- Click **Control Panel**.
- In the search box, type **adapter**
- Under Network and Sharing Center, click **View network connections**.
- Right-click the connection that you want to change, and then click **Properties**.
  - If you’re prompted for an administrator password or confirmation, type the password or provide confirmation.
- Under **This connection uses the following items**, click **Internet Protocol Version 4 (TCP/IPv4)** and then click **Properties**.
- In the IP address field, enter **192.168.1.2**.
- In the Subnet mask field, enter **255.255.255.0**.
- Leave the **Default gateway** and **DNS settings** fields empty
- Click **OK** and close the dialog boxes.
DNS settings fields empty.

- Click OK and close the dialog boxes.

**Configure Your 21000 Appliance**

- Launch the Web browser and type `https://192.168.1.1` in the address bar.

**Note** – You might receive a certificate error page due to a known, unresolved browser conflict. Click Continue to this Web site.

Log in with the default system administrator login name/password, `admin/admin`, and click Login.

**Note** – Popups must always be allowed on `https://<appliance_ip_address>`.

- After logging in for the first time and changing the default login name and

For additional information regarding setting up your appliance, refer to the *21000 Getting Started Guide*. 
password, the First Time Configuration Wizard will begin automatically.

- The wizard will guide you through the connection setup process. Fill in the parameters as required and click Finish.

Registration and Technical Support

**Appliance Registration**
21000 appliances require a license to be installed prior to operation.

To license and register your appliance, please visit:
http://register.checkpoint.com/cpapp

If you are evaluating a 21000 appliance, you will have access to a 15-day evaluation license key.

**Appliance User Center**
