Check Point 4000 Appliances
Quick Start Guide

Includes Check Point Software Blades
1

Rail Installation

- The illustration to the right shows a Check Point 4000 appliance with its rails fully installed.
- For detailed instructions on rail installation for the 4000 appliances, please refer to the Check Point 4000 Getting Started Guide in the Check Point Support Center.

2

Power Up Your Check Point 4000 Appliance

- Connect the power cable to the power port on the 4000 appliance rear panel and plug it into a power outlet.
- Turn the power on.

3

Connect Your PC for Initial Setup

- Initial setup must be done from a PC connected to the appliance’s management interface via the included Ethernet cable. Management interface is marked as MGMT on the appliance chassis. After completing the initial connection, the First Time Configuration Wizard will guide you through the process of configuring the appliance.
- Before continuing, make sure your PC is configured correctly.
For Windows XP Operating Systems

- Click Start > Settings > Control Panel > Network Connections.
- Double-click Local Area Connection.
- In the General tab, click Properties.
- In the IP address field, enter 192.168.1.2.
- In the Subnet mask field, enter 255.255.255.0.
- Leave the Default gateway and DNS settings fields empty.
- Click OK and close the dialog boxes.

For Windows 7 and Windows Vista Operating Systems

- Click Control Panel > Network and Internet > Network and Sharing Center > Manage network connections.
- Right-click Local Area Connection, and then click Properties. If you are prompted for an administrator password or confirmation, type the password or provide confirmation.
- Click the Networking tab. Under This connection uses the following items, click Internet Protocol Version 4 (TCP/IPv4), and then click Properties.
- In the IP address field, enter 192.168.1.2.
- In the Subnet mask field, enter 255.255.255.0.
- Leave the Default gateway and DNS settings fields empty.
- Click OK and close the dialog boxes.
Configure Your 4000 Appliance

- Launch the Web browser and type `https://192.168.1.1` in the address bar.
  
  **Note** – You might receive a certificate error page due to a known, unresolved browser conflict. Click **Continue to this Web site**.

- Log in with the default system administrator login name/password, `admin/admin`, and click **Login**.
  
  **Note** – Popups must always be allowed on `https://<appliance_ip_address>`.

- After logging in for the first time and changing the default login name and password, the First Time Configuration Wizard will begin automatically.
- The wizard will guide you through the connection setup process. Fill in the parameters as required and click **Finish**.

For additional information regarding setting up your appliance, refer to the *Check Point 4000 Appliances Getting Started Guide*. 
Registration and Technical Support

**Appliance Registration**
4000 appliances require a license to be installed prior to operation.

To license and register your appliance, please visit:
http://register.checkpoint.com/cpapp

If you are evaluating a 4000 appliance, you will have access to a 15-day evaluation license key.

**Appliance User Center**
