21400 Appliances Image Management

Congratulations on your purchase of a Check Point appliance. This appliance is preinstalled with the following software images:

- R71.40
- R75.30

Turning the Appliance On

When the appliance is turned on for the first time, it loads with the R71.40 default image.

Enabling R75.30

To enable the R75.30 image on the appliance using the LCD panel:
1. Reboot or turn on the appliance.
2. When the countdown begins, press an arrow button.
3. Use the arrow buttons to scroll and select the Reset to R75.30 option.
4. Press ▲.
5. Confirm the reset and press \( \Delta \) again.
   If you press a different button, the **Action Canceled** message shows.

   ![Action Cancelled
   Press any key](image)

   At this point, if you press a key, the boot menu shows.

6. After you confirm the reset, wait for the appliance to enable the R75.30 image.
   During the restore, a message shows continuously: **Reverting image. Do not turn off.**
   After the process has finished, the appliance boots with the selected software image.

**Restoring R71.40**

To return to R71.40, do the procedure for **Enabling R75.30** but choose **Reset to factory defaults - R71.40** in step 3.
