21600 Appliances Image Management

Congratulations on your purchase of a Check Point appliance. This appliance is preinstalled with images for these software versions:

- R75.45 Gaia
- R75.30 SecurePlatform
- R71.40 SecurePlatform

Default Image

When the appliance is turned on for the first time, it loads with the default image: Check Point R75.45 on the Gaia operating system.

Changing the Software Image

Use the LCD panel to change the software image or to revert back to the factory default settings for the current software image.

To change the software image for the appliance:
1. Reboot or turn on the appliance.
2. When the countdown begins, press an arrow button.
The **Boot** menu shows.

3. Use the arrow buttons to scroll and select a software image from the list.

4. Press \( \Delta \).

5. Confirm the reset and press \( \Delta \) again.
   
   If you press a different button, the **Action Canceled** message shows.

   ![Action Cancelled](image)

   At this point, if you press a key, the boot menu shows.

6. After you confirm the reset, wait for the appliance to enable the R75.45 image.
   
   During the restore, a message shows continuously: **Reverting image. Do not turn off.**
   
   After the process has finished, the appliance boots with the selected software image.
