Introduction

Thank you for updating to Check Point 700 Appliance. This version contains new features and resolves different issues.

Please read this document carefully before using Check Point 700 Appliance.

Important Solutions

For more about this version of Check Point 700 Appliance and to download the software, see sk110268 (http://supportcontent.checkpoint.com/solutions?id=sk110268).

To see Known Limitations and Resolved Issues for Check Point 700 Appliance, see sk109124 (http://supportcontent.checkpoint.com/solutions?id=sk109124).

What's New

New in R77.20.16 for Check Point 700 Appliance:

New Firmware for Check Point 730/750 Appliances, based on the R77.20.15 release.

- Includes an important fix to prevent connectivity issues to the Security Management server when managed by SMP.
- Security fix - glibc Buffer Overflow (CVE-2015-7547)

Installing Check Point 700 Appliance

To install the Check Point 700 Appliance:

1. After connecting the cables, run the First Time Configuration Wizard.
2. Initiate a connection from your browser to http://my.firewall and confirm the security message.
3. Use the web management portal to set up your security blades and policy.

For details, see the Getting Started Guide of your model in the 700 Appliance series.
## Supported 3G and 4G/LTE Modems

These are the supported 3G and 4G/LTE modems:
